

STELLARIS GROUP

Product Portfolio & Sales Enablement Guide

Stellaris Technology Services · Sales Team Internal Document

Version 6.0 · Q1 FY2026 · Confidential — For Sales Use Only

1. About Stellaris Technology Services

Stellaris Technology Services (STS) is the B2B technology division of Stellaris Group. STS builds the StellarOps workflow automation platform, serving 340+ enterprise and mid-market clients across BFSI, healthcare, manufacturing, and retail.

FY2025 metrics: ₹3,100 Crore revenue. 97% renewal rate (Year 1+). Average deal cycle: 8 weeks (Growth tier) / 14 weeks (Enterprise). Win rate vs. WorkflowMax (primary competitor): 62%. NPS: 68.

2. Product Tiers

2.1 StellarOps Starter

- Target: Organisations with 5–24 users
- Pricing: ₹2,200/user/month (monthly) | ₹1,799/user/month (annual)
- Minimum commitment: No minimum for monthly. 12 months for annual.
- Core capabilities: Workflow automation (up to 50 active workflows), 10GB cloud storage, 100 API calls/minute
- Integrations: Zoho suite, Slack, Google Workspace, Microsoft 365, Razorpay, Stripe
- Support: Email only (SLA: 24 hours). No CSM assigned.
- Data residency: India (AWS ap-south-1, Mumbai). Immutable.
- Setup time: Self-serve. Typically configured within 1 business day.

2.2 StellarOps Growth

- Target: Organisations with 25–199 users
- Pricing: ₹3,999/user/month (annual only, minimum 25 seats)
- Core capabilities: All Starter + Advanced analytics, SSO (SAML 2.0, OAuth 2.0), custom API integrations, 100GB storage, 1,000 API calls/minute
- SLA: 99.9% uptime (contractual). P1 response: 2 hours. P2: 8 hours.
- Integrations: All Starter + Salesforce, SAP, Oracle, Tally, custom webhooks
- Support: Dedicated Customer Success Manager (CSM) + email + phone (9am–7pm IST Mon–Sat)
- Setup time: 3–5 business days with CS team assistance

2.3 StellarOps Enterprise

- Target: Organisations with 200+ users, regulated industries (BFSI, healthcare, government)

- Pricing: Custom. Typical: ₹3.8L– ₹12L/month for 200–500 seat deployments.
- Core capabilities: All Growth + on-premise deployment option, custom SLA (up to 99.99%), white-labelling, dedicated infrastructure, quarterly business reviews
- Compliance: HIPAA-ready, DPDP Act 2023, GDPR, STQC (Government of India empanelled)
- Support: 24/7 premium support, dedicated Technical Account Manager, named escalation path
- Sales cycle: Typically 6–14 weeks. Involves procurement, legal review, CISO sign-off.

3. Competitive Battle Cards

3.1 vs. WorkflowMax (Most Common Competitor)

Dimension	StellarOps	WorkflowMax
Data residency	India only (AWS Mumbai). Guaranteed.	Defaults to Singapore. India option costs extra.
WhatsApp integration	Native, included in all tiers	Requires Twilio middleware (+ 1800/user/month)
G2 Rating	4.6 / 5 (820 reviews)	3.9 / 5 (340 reviews)
Implementation time	1–14 days depending on tier	6–8 weeks average
India compliance (DPDP)	Certified, FY2024	Roadmap only, not yet certified
Price (25 seats, annual)	13,999/user/month	13,200/user/month (excl. WhatsApp add-on)
Renewal rate	97% (Year 1+)	Not published publicly

3.2 vs. In-House Build

When a prospect says "we can build it ourselves", use this framework:

Factor	StellarOps	Custom Build
Time to first value	5–14 days	18–24 months (median)
Year 1 cost (50 seats)	128.8L	180–150L (dev + infra + testing)
Maintenance overhead	Zero (included in subscription)	1–2 FTE engineers permanently
SLA responsibility	Ours	Yours — every outage is an internal incident
Feature velocity	6 major releases/year	Dependent on internal roadmap
Risk	Low — proven platform	High — turnover, technical debt, scope creep

4. Top Objections & Responses

"It's too expensive"

Response: Let's run the ROI calculator together. Across our 340 clients, average payback period is 4.1 months. The NBFC client (8,000 employees) reduced operational costs by 62% in 6 months. I can share that case study — they're comfortable being referenced. Would that help move the evaluation forward?

"We're evaluating"

WorkflowMax at the same time"

Response: That's common, and we welcome the comparison. We've won 19 of our last 23 competitive evaluations against WorkflowMax. Would you be open to a 30-day parallel run on one use case? You define the evaluation criteria in Week 1, and the data decides. No obligation.

"Data security is a concern"

Response: Understood — and it's the right concern. We're SOC 2 Type II certified (last KPMG audit: March 2025), ISO 27001:2022 (Certificate #IN-27001-0872), and DPDP Act 2023 compliant. All your data stays in India — AWS ap-south-1, Mumbai. If you'd like, I can arrange a 30-minute call between your CISO and our Chief Information Security Officer before you proceed. We do this for every Enterprise evaluation.

"We need more time internally"

Response: I understand. Can I offer a 45-day POC instead? A dedicated implementation engineer works with your team, and we establish the evaluation criteria together at the start. It removes the guesswork. POC to close — we typically see a decision by Day 40.

5. Current Promotions (Q1 FY2026)

- Annual plan: 2 months free with any 12-month Growth or Enterprise commitment (effective 16.7% discount)
- WorkflowMax migration: Waived implementation fees (standard: ₹80,000 Starter / ₹12,50,000 Enterprise)
- SME offer: Starter plan at ₹1,499/user/month for first 6 months (minimum 10 seats, new logos only)
- Nonprofit rate: 30% discount on any tier for registered nonprofit organisations (Section 8 / 12A certificate required)

6. Certifications & Compliance

Certification	Body	Cert Number	Valid Until
ISO 27001:2022	Bureau Veritas	IN-27001-0872	March 2027
SOC 2 Type II	KPMG India	KPMG-SOC2-2025-ST5	March 2026 (annual)
DPDP Act 2023	MEITY (India)	MEITY-DPF-2024-11832	Annual renewal
GDPR	EU DPA (Netherlands)	EU-GDPR-NL-ST5-2024	Ongoing
STQC (Gov empanelled)	STQC India	STQC/CE/2024/0441	September 2025
